## **ADMINISTRATIVE INFORMATION**

**Acquisition Information:** The Flight Safety Foundation established the Jerry Lederer Aviation Safety Library in 1989. Jerome Lederer donated his papers to the library over the course of the next fifteen years, and additional materials were donated by the Lederer Family following Lederer's death in 2004. In 2011, the Flight Safety Foundation transferred the Library, including the Lederer Papers, to the Aviation Safety and Security Archives at Embry-Riddle Aeronautical University. Archives accession number 2011.002.

**Access:** Open. Consult archives staff for information about access to unprocessed material.

**Preferred Citation:** [Item title or description]. Jerome Lederer Papers, part of the Flight Safety Foundation Jerry Lederer Aviation Safety Library (MS-016). Aviation Safety and Security Archives, Embry-Riddle Aeronautical University, Prescott, Arizona.

## **BIOGRAPHICAL HISTORY**

Jerome Fox ("Jerry") Lederer is often called the "father of aviation safety." He began his career as an aeronautical engineer for the U.S. Air Mail Service in the 1920s prior to becoming chief engineer for Aero Insurance Underwriters, one of the world's largest aviation insurance companies at that time. In addition to assessing aviation risks for the company, Lederer carried out safety audits and educational programs and produced a widely acclaimed safety newsletter. In 1940, Lederer was named director of the newly-created Civil Aeronautics Board Safety Bureau, a forerunner to the National Transportation Safety Board. He left the Safety Bureau in 1942 for a position with the Airlines War Training Institute.

In the aftermath of a Lockheed Constellation accident in 1946, Lederer organized a meeting to discuss ways to disseminate safety information. The Flight Safety Foundation was formed in 1947 as a result of this meeting, and Lederer served as its director until 1967. Lederer also was director of the Cornell-Guggenheim Aviation Safety Center from 1950 to 1967. Upon his retirement from FSF, Lederer was asked to establish an Office of Manned Space Flight Safety for NASA to address safety issues in the Apollo Program following the January 1967 launch-pad fire that killed three astronauts. Lederer retired from NASA in 1972, but continued to be an advocate for aviation safety until his death in 2004 at age 101.

## SCOPE AND CONTENT

The Lederer Papers contain correspondence, speeches, articles, reports, photographs, news clippings, publications, an oral history interview, and memorabilia spanning Lederer's entire career.

Included are records relating to a number of aviation insurance companies including Barber and Baldwin, Aero Insurance Underwriters, Aerotech Insurance Underwriters, Aero Engineering and Advisory Service, and Charles A. Rheinstrom, Inc. The collections also contains documents relating to Lederer's time as director of the Civil Aeronautics Board Safety Bureau (1940-1942), as well as his work for the Airlines War Training Institute (1942-1943).

Lederer's work as technical director of the Flight Safety Foundation (1948-1967) and its predecessor organization Aviation Engineering for Safety (1947-1948), as well as his concurrent position as director of the Cornell-Guggenheim Aviation Safety Center (1950-1967), is well represented. Records related to Aviation Crash Injury Research/Aviation Safety and Engineering Research (AvCIR/AvSER) are included in the Flight Safety Foundation and Cornell-Guggenheim Aviation Safety Center records. Lederer's continuing association with Flight Safety Foundation after his 1967 retirement from the Foundation is also documented in the collection.

The Lederer Papers also include documents relating to the National Aeronautics and Space Administration (NASA) and the space program, notably Lederer's work as Director of the Office of Manned Space Flight Safety for the Apollo program as well as his subsequent position as Director of Safety for NASA.

In addition, the Lederer Papers contain writings, speeches, and other presentations by Lederer spanning his career. Additional writings by Lederer can be found in the publications of Aero Insurance Underwriters and the Flight Safety Foundation. Also documented is Lederer's involvement with the aviation safety work of government agencies, associations and organizations, and various committees. The collection also includes correspondence and biographical materials, as well as documents relating to the numerous awards and honors that he received.

Information on other individuals, writings by these individuals, and correspondence between other individuals and Lederer may be found in the Other Individuals series. However, the bulk of Lederer's correspondence (including correspondence with individuals listed in the Other Individuals series) is filed in the Correspondence Series. The collection also documents Lederer's involvement in the Air Mail Pioneers, and also includes files on other aviation history topics.

## **ARRANGEMENT**

The Jerome Lederer Papers are organized in sixteen series.

- Series. Airlines War Training Institute
- Series. Aviation History
- Series. Aviation Insurance
- Series. Biographical and Personal
- Series. Civil Aeronautics Board Safety Bureau
- Series. College of Aeronautics, LaGuardia Airport
- Series. Conferences, Seminars, and Symposia
- Series. Cornell-Guggenheim Aviation Safety Center
- Series. Correspondence
- Series. Flight Safety Foundation
- Series. National Aeronautics and Space Administration
- Series. Organizations and Committees
- Series. Other Individuals
- Series. Topical Files
- Series. University of Southern California
- Series. Writings, Speeches, and Addresses by Lederer

The collection was received with little original order. Portions of the collection were received organized in original folders. Where possible, what original order did exist has been maintained, however the overall series arrangement was imposed by the archives during processing.

## **PRELIMINARY INVENTORY**

Throughout this inventory, box numbers are given to assist in locating materials. For a given subject, there will be only one file within a box unless otherwise indicated (e.g., box 41A (2f) indicates that box 41A contains two files on the subject).

**Series.** Airlines War Training Institute, 1942-1943

**Extent:** 2 boxes and 8 folders

The Airlines War Training Institute (AWTI) was an unincorporated association of nineteen American airlines that was formed in August 1942 to meet the need for air transport personnel to support the war effort. Lederer served as vice president and head of AWTI's administrative section. In October 1943, AWTI was formally disbanded, having met the needs of Air Transport Command through the training of approximately 12,000 flight crew and 35,000 ground personnel. This series contains materials related to the organization, primarily AWTI publications.

Note: Processing of the collection is ongoing. In addition to the material identified below, additional items of interest may be located in the unprocessed portions of the collection. Please contact the archivist for additional information.

**Series.** Aviation History, 1910-2002

**Extent:** 34 folders

This series contains items collected by Lederer related to the history of aviation. Of particular note is material on the history of air mail in the United States and records of the Air Mail Pioneers. Lederer served as president of the Air Mail Pioneers from 1976 to 1999. In addition to the information filed here, additional materials may be found in the Topical Files series and in the Other Individuals series.

Note: Processing of the collection is ongoing. In addition to the material identified below, additional items of interest may be located in the unprocessed portions of the collection. Please contact the archivist for additional information.

**Series.** Aviation Insurance

**Extent:** 29 folders

Lederer worked in the aviation insurance business from 1927 to 1940 and again in the mid-1940s. This series contains materials related to aviation insurance companies for which Lederer worked, as well as later information on aviation insurance collected by Lederer. Of note are the safety bulletins distributed by Aero Insurance Underwriters. Lederer's experience and focus on the dissemination of safety information, as illustrated by these bulletins, was one of the factors that led to the formation of the Flight Safety Foundation in 1947.

Note: Processing of the collection is ongoing. In addition to the material identified below, additional items of interest may be located in the unprocessed portions of the collection. Please contact the archivist for additional information.

**Series.** Biographical and Personal, 1917-2005

**Extent:** 79 folders

This series contains biographical material about Lederer; correspondence, clippings, programs, and other items related to awards and honors received by Lederer; materials related to Lederer's education and early career; photographs; and other memorabilia. The series also contains material about Lederer's wife, Sarah, and his family. Although not listed in this inventory of textual records, the collection also includes many of the numerous awards that Lederer received in his lifetime; contact the archives for additional information on these items, which include plaques, medals, statues, and similar items.

Note: Processing of the collection is ongoing. In addition to the material identified below, additional items of interest may be located in the unprocessed portions of the collection. Please contact the archivist for additional information.

**Extent:** 21 folders

When the Civil Aeronautics Board (CAB) was established in 1940, Lederer was asked to serve as the first director of the new agency's Safety Bureau. The CAB Safety Bureau was responsible for safety rulemaking as well as for accident investigation. This series contains documents from Lederer's time in the Safety Bureau (1940-1942). Later materials related to CAB and to its successor agencies may be found in the Organizations and Committees Series.

Note: Processing of the collection is ongoing. In addition to the material identified below, additional items of interest may be located in the unprocessed portions of the collection. Please contact the archivist for additional information.

**Extent:** 14 folders

Lederer served as director of the Cornell-Guggenheim Aviation Safety Center from 1950 until 1967. He held this position concurrently while serving as managing director of the Flight Safety Foundation. The Safety Center, which had accomplished its mandate to make aviation as safe as transportation by train, was closed soon after Lederer's retirement from the directorship. This series contains records related to the Safety Center and its work. Also included is information on the Crash Injury Research program originally established by Hugh deHaven at Cornell University Medical School. The aviation side of the program (which also included automotive safety) was transferred to the Cornell-Guggenheim Center following the center's establishment in 1950. It was renamed Aviation Crash Injury Research (AvCIR) and was later known as Aviation Safety and Engineering Research (AvSER). Additional materials related to AvCIR/AvSER, which became a subsidiary of the Flight Safety Foundation in 1959, can be found in the Flight Safety Foundation Series.

Note: Processing of the collection is ongoing. In addition to the material identified below, additional items of interest may be located in the unprocessed portions of the collection. Please contact the archivist for additional information.

**Series.** Flight Safety Foundation

**Extent:** 102 folders

The Flight Safety Foundation has its origins in two organizations formed in the late 1940s. In 1947, a meeting organized by Lederer led to the creation of Aircraft Engineering for Safety, an organization focused on the dissemination of safety information. Shortly afterward, this group merged with another group that had been formed to study cockpit design, and the combined organization adopted the name of the second group, Flight Safety Foundation. Lederer served as managing director of the Foundation from its formation until 1967. This series contains records relating to the activities of the Flight Safety Foundation and Lederer's work with the Foundation.

Note: Processing of the collection is ongoing. In addition to the material identified below, additional items of interest may be located in the unprocessed portions of the collection. Please contact the archivist for additional information.

boxes 53B, 66A

**Series.** Other Individuals

**Extent:** 109 folders

This series contains material relating to people other than Jerry Lederer, including biographical information and clippings, writings, and correspondence between these individuals and Lederer. The bulk of this series consists of papers and articles written by various authors, primarily on aviation and/or safety related topics; the majority of these writings have not yet been sorted by author. See also the Correspondence series, as well as the Flight Safety Foundation series for information on Foundation personnel.

Note: Processing of the collection is ongoing. In addition to the material identified below, additional items of interest may be located in the unprocessed portions of the collection. Please contact the archivist for additional information.

**Series.** University of Southern California, 1952-1992

**Extent:** 7 folders

This series contains documents related to the University of Southern California (USC) and its Institute of Safety and Systems Management. The Flight Safety Foundation formed a partnership with USC during the 1970s, and Lederer also was an adjunct professor at USC.

Note: Processing of the collection is ongoing. In addition to the material identified below, additional items of interest may be located in the unprocessed portions of the collection. Please contact the archivist for additional information.

General, 1952-1992

boxes 51A, 54B, 56A, 67A, 69B, 87A, 92A

**Series.** Writings, Speeches, and Addresses by Lederer, 1931-2001

This series contains articles, publications, speeches, lectures, and other presentations by Jerry Lederer. An inventory is forthcoming; please contact the Archives for information.

Note: Processing of the collection is ongoing. In addition to the material identified below, additional items of interest may be located in the unprocessed portions of the collection. Please contact the archivist for additional information.

## **Unprocessed material**

Processing of the Lederer Papers is ongoing. In addition to the series listed, there is significant material that is unprocessed/partially processed and not yet classified within a series. A list of the files containing these items is included here.

Please note: items that were in original folders have not been processed. They are included on this listing using the original label information from the folder. This original label may or may not correspond to the actual contents of the folder as folders may have been reused.

Advertisements and brochures, 1997
